

GINTARAS DIČIUS

Electrical Installation & Building Management Systems (BMS) Installer

UK: +44 7561 430471

Email: gdstudio360@gmail.com

Ipswich, United Kingdom

PROFESSIONAL PROFILE

Practical and safety-conscious Electrical Installation and BMS Installer with three years of hands-on experience on commercial projects in the United Kingdom. Experienced in BMS control panels, AHU, MVHR and ASHP systems, field devices, control wiring, BACnet and Modbus communication cabling. Confident reading electrical schematics, testing circuits, tracing faults and working alongside controls and commissioning engineers.

CORE TECHNICAL SKILLS

- Commercial electrical installation
- BMS control panel wiring
- AHU, MVHR and ASHP controls
- Sensors, valves and actuators
- BACnet and Modbus cabling
- Cable containment and field wiring
- Electrical schematic interpretation
- Continuity testing and fault finding
- Safe working on active construction sites
- Clear cable identification and tidy installation

EMPLOYMENT HISTORY

Electrical Installation & BMS Installer

United Kingdom | 2023-2026 | Commercial projects

- Installed and terminated electrical and control cabling on commercial plant rooms and building-services projects.
- Connected BMS control panels, controllers, terminal blocks, isolators and associated field equipment.
- Completed control wiring for AHU, MVHR and ASHP systems, including fans, pumps, dampers and valves.
- Installed and connected temperature, pressure, airflow and differential-pressure sensors.
- Wired electric actuators, control valves and other BMS field devices in accordance with project schematics.
- Installed and terminated BACnet and Modbus communication cabling.

EMPLOYMENT HISTORY - CONTINUED

- Read electrical and controls drawings, identified cable routes and planned installation sequences.
- Carried out continuity checks, circuit testing and first-line fault finding.
- Worked with BMS engineers and commissioning teams to confirm signals and resolve installation issues.
- Maintained safe, organised and clearly labelled work areas in line with UK site requirements.

CERTIFICATIONS

- EAL Level 3 Award - Requirements for Electrical Installations BS 7671:2018 (18th Edition)
- ECS Electrical Labourer Card - valid until January 2029
- IPAF Operator Training, categories 3a and 3b - valid until December 2030
- IOSH Safety, Health and Environment for Construction Workers

LANGUAGES

- Lithuanian - native
- Russian - conversational
- English - working proficiency

PROFESSIONAL STRENGTHS

- Reliable and responsible
- Practical problem solving
- Attention to detail
- Teamwork across multiple trades
- Willingness to learn and develop

CAREER OBJECTIVE

Seeking an Electrical Installation, BMS Installer or controls-related position in the Ipswich area or on UK projects where I can apply my commercial site experience and continue developing within a professional engineering team.
